

Calibration Kits

Laboratory and Portable

Compliance with ASTM Calibration Procedure D3474-90*

Laboratory Calibration Kit

- For use in calibrating SureTorque Model ST-120 and Model ST-LAB torque testers
- Kit consists of:
 - Wire
 - Certified hook weights (2, 5 & 10 lb.)
 - Frame*
 - Pulleys (0.5, 1, 1.5, and 2" radius)
- Check linearity of the calibration at 25 theoretical torque values (0, 1, 2, 2.5, 3, 3.5, 4, 5, 6, 7, 7.5, 8.5, 10, 10.5, 12, 14, 15, 17, 18, 20, 22.5, 24, 25.5, 30 and 34 lb-in)

Portable Calibration Kit

- For use in calibrating SureTorque Model ST-120 and Model ST-LAB torque testers
- Kit consists of:
 - Wire
 - Certified hook weight (10 lb.)
 - Frame*
 - Pulleys (1" and 2" radius)
- Check linearity of the calibration at 3 theoretical torque values (0, 10 and 20 lb-in)

Other configurations available on request..

**Specify whether using the ST-120 or the ST-LAB.*
