

Quality Assurance Instrumentation Torque Testing Equipment

Sure Check is a new daily quick calibration tool that gives you an easy way for your team/operator to check the calibration set up of your SureTorque equipment...before a new run; or anytime!

NEW from SureTorque *“Sure Check”*

To use, you simply raise the head; remove the production collet; insert the *Sure Check* into the normal “collet” position...

SureTorque New Sure Check Calibration Check...

Meets and exceeds the performance of competitive designs.

The ***Sure Check's*** 1-20 lbf-in range can be factory set to your specific value check range.

Sure Check can be used as an R&R confirmation check as part of your validation process!
